Experience

I have worked in the film industry for over 20 years in a wide range of roles and formats of production. I have worked as a camera operator and editor for the World Surf League and on branded web content, behind the scenes videos, extreme sports TV shows and documentaries. 2014 saw my technical skills and experience applied to a new role as a Video Assist Operator.

Since 2014 I have been a Video Split operator on TVCs. Using technical and communication skills, I provide fast and efficient monitoring, playback, effects composition and editing to the director, DOP, crew, client and agency, thus assisting them through the production process. With a cheer and smile!!!

Equipment/Skills

Along with my service as an operator I have my own complete kit of Video Assist equipment available to hire to your prouction. I offer On-set live vision mixing/green screen, Editing and frame matching with exteme efficiency.

I supply battery operated Video packaes consisting of Qtake HD Software and Hardware, Small HD Ultra Bright monitor and, Teradek Trasmitters.

Please contact me for an equipment list and quote.
