EQUIPMENT

My Kit is full and complete for SINGLE Camera VTR Operation. I have all of the latest video cards, wireless transmitters and HD/4K Monitor for premium instant video capture and playback requirements. I have all of the necessary backup machines and video cards to ensure the system can function through the toughest conditions. I have the capability to stream to client/agency and directors remotely, however, I do recommend a streaming test prior to each job to ensure that everyone can access the stream on the day.
