I bring over 20 years of hands-on experience delivering complex high budget productions across international feature films, scripted TV (adult and children's), unscripted formats, theatre and live events. I specialize in managing every logistical and financial detail from development through post and delivery, ensuring productions stay on schedule and on budget without compromising creative vision. I'm known for my ability to lead teams under pressure, navigate shifting priorities with calm efficiency, and maintain strong communication across all departments and stakeholders.

Whether it's a fast-paced shoot or a multi-country production, I bring organisation, foresight, and the problem-solving instincts to keep things running smoothly from prep to wrap.
